## **Informed consent Psycorona study**

Principal Investigators: Dr. N. P. Leander, University of Groningen & Dr. J. J. Bélanger, New York University Abu Dhabi

Ethics approval: ecp@rug.nl (study code: PSY-1920-S-0390); irbnyuad@nyu.edu (study code: HRPP-2020-42)

### **Purpose of the research**

Thank you, for volunteering, once again, to help us understand how people deal with the current situation. This survey will ask about your thoughts, feelings, and motivations regarding recent developments in society, the coronavirus, and your current economic situation. **This survey typically takes 15 minutes. We plan to run these studies monthly. You can decide every month whether you want to continue getting a monthly questionnaire.**

You are under no obligation to participate in this survey. If you agree to participate, you are free to stop your participation at any time by closing the browser window. Your data will then be removed from the data set.

We are unable to provide financial reimbursement; thank you for volunteering.

### **Types of data collected**

This is a list of sensitive questions you will encounter in this survey. Note that you can always skip any question you do not feel comfortable answering. If you are interested in understanding how we protect your privacy, personal data, and rights have a look here.

#### **Personal data (optionally provided by you)**

##### **Directly identifiable personal data:**

- Email address, location data (i.e., postal code)

##### **Indirectly identifiable personal data:**

- Gender, age range, education level, employment status, country of residence

##### **Sensitive personal data (a.k.a. special categories of personal data)**

- Political beliefs, religious beliefs, health data

### **How will data be collected and handled**

We have specified a full list of steps on how we handle your data and protect your privacy. Especially your directly identifiable data is protected through a rigorous mechanism. If you want to see the specific steps of how we handle your data, have a look here.

Please note that developmental research studies are never completely anonymous. We will need to collect a means of contacting interested participants for follow-up surveys and will generate a random participant identification number in order to connect data over multiple measurements.

However, we have taken the following steps to protect your privacy:

- (1) If you choose to be invited to follow-up surveys we will ask you to provide an email address.

Your email address and location data (postal code) are considered “directly identifiable personal data”. We will delete your email address and postal code within three months of the project completion or by January 1st, 2021 (if the study extends beyond ethical approval (i.e., January 1st, 2021), we will extend it at the consent of the ethics board; this coming fall 2020, we will do a data protection impact assessment to determine if the information is still up to date and we will take more measures if needed; we will make all that information available on our website). Your email address will also only be used for recontact and data merging. We will remove your email from the data sets after the data provided in different surveys have been linked. The data set is then effectively pseudonymized.

(2) We also ask you to optionally provide “sensitive personal data” (i.e., your religious and political beliefs, and health information; also see GDPR) as well as some “indirectly identifiable personal data” (i.e., your gender, mother language, education level, and country of residence). We collect these data in order to learn more about individual and group differences in dealing with the corona virus around the world. However, to minimize access to your sensitive and personal data the joined controller group has put a proposal system in place where access to the data is only granted upon vetted requests and only to variables absolutely necessary to the research question of collaborating researchers (see here for the full process).

(3) The data from this study will be stored in a secure location in the Department of Psychology at the Universities pursuant to data management policies of the universities and regulations of the federal government and the American Psychological Association and the Netherlands Ethics Code (Nethics code).

(4) Only members of the research team will have access to the surveydata.

(5) You have the right to obtain a copy of your data, correct it or ask to delete it until January 1st, 2021.

(6) If you would like to know more about how exactly your data will be processed and shared with collaborators see our data handling documentation and our Frequently Asked Questions section on our website. The data will be used solely for scientific and public information purposes, but will not be used for commercial purposes.

### **Rights of participants**

If you have any questions about your rights, do not hesitate to contact [privacy@rug.nl](mailto:privacy@rug.nl) or the data protection officer at [a.r.deenen@rug.nl](mailto:a.r.deenen@rug.nl) (A.R. Deenen).

### **Information about storage and re-use of data**

We have developed a full data management procedure about where your data is stored and how long it is stored. There you can also have a look at how we share your data with researchers from other universities.

*I have read the above information. I agree to participate in this study and to the processing of my personal data as described above. I also agree to my data being transferred outside of the European Economic Area. I understand that my participation is entirely voluntary and that I may withdraw at any time by closing the browser window. I know that I can ask to have my data accessed, changed, or erased.*

---

**Do you agree to participate in this study (and confirm that you are older than 18)?**

Yes, I agree to participate.

---

**This is a multiple-week (long-term) research study. Through your continued support, we can better understand the link between human psychology and the current challenges.**

**If you do not want to be recontacted again, please click the unsubscribe link in the email that you received from us.**

**We will start by asking some general questions about yourself.**

**Debriefing:**

The goal of this university-based psychological study is to examine how the public feels and thinks about the coronavirus epidemic and the economic impact stemming from it. Your responses will help us learn how to better predict the progression of the epidemic. The general idea is that people's mindsets, attitudes, feelings, beliefs, or intuitions, which translate into behavior, influence and predict the development of the epidemic in certain areas. The study also includes several questions about society and its challenges; as you probably saw, some questions ask about sensitive social issues. All of these questions share a singular aim: to improve the prediction of viral outbreaks and to do so as fast and accurately as possible.

There are a two things we would like to point you to:

1. If you are interested in understanding how your data is managed have a look here: [Data handling](#).
2. If you are interested in understanding how your responses are implemented in research have a look here: [Data visualization](#)

If you have any questions or concerns about the study or your participation, you are welcome to contact the research team ([psycorona@rug.nl](mailto:psycorona@rug.nl)) or have a closer look at the webpage [psycorona.org](http://psycorona.org). You are also welcome to contact our university ethics board at [ecp@rug.nl](mailto:ecp@rug.nl) or [irbnyuad@nyu.edu](mailto:irbnyuad@nyu.edu) referring to the following study code: PSY-1920-S-0390 (RUG) or HRPP-2020-42 (NYU). The principal investigators are Dr. N. P. Leander, University of Groningen, and Dr. J. J. Bélanger, New York University Abu Dhabi.
